Host, Student-Leader

farmagogo

a farm to school mobile app in the philippines

Problem

- **Farmers** sell produce at low prices, exploited
- **Schoolchildren** do not get proper nutrition

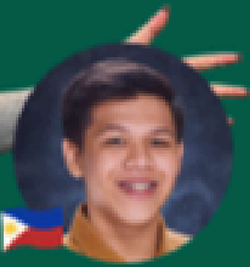

Execution

- **a Shopee for agri goods**
- **mobile app** operating like a **startup**
- optimize the value chain

The Team

JOSH PARAISO
Chief Executive Officer
University of the Philippines - Diliman
BS in Business Administration

ANGEL MARARAC
Chief Finance Officer
Ateneo de Manila University
AB Management Economics

JULIANNE YSRAEL
Chief Operating Officer
Ateneo de Manila University
BS IT Entrepreneurship

SUKANYARAT PANTENG
VP on Partnerships & Sales
Prince of Songkla University
BA in English major

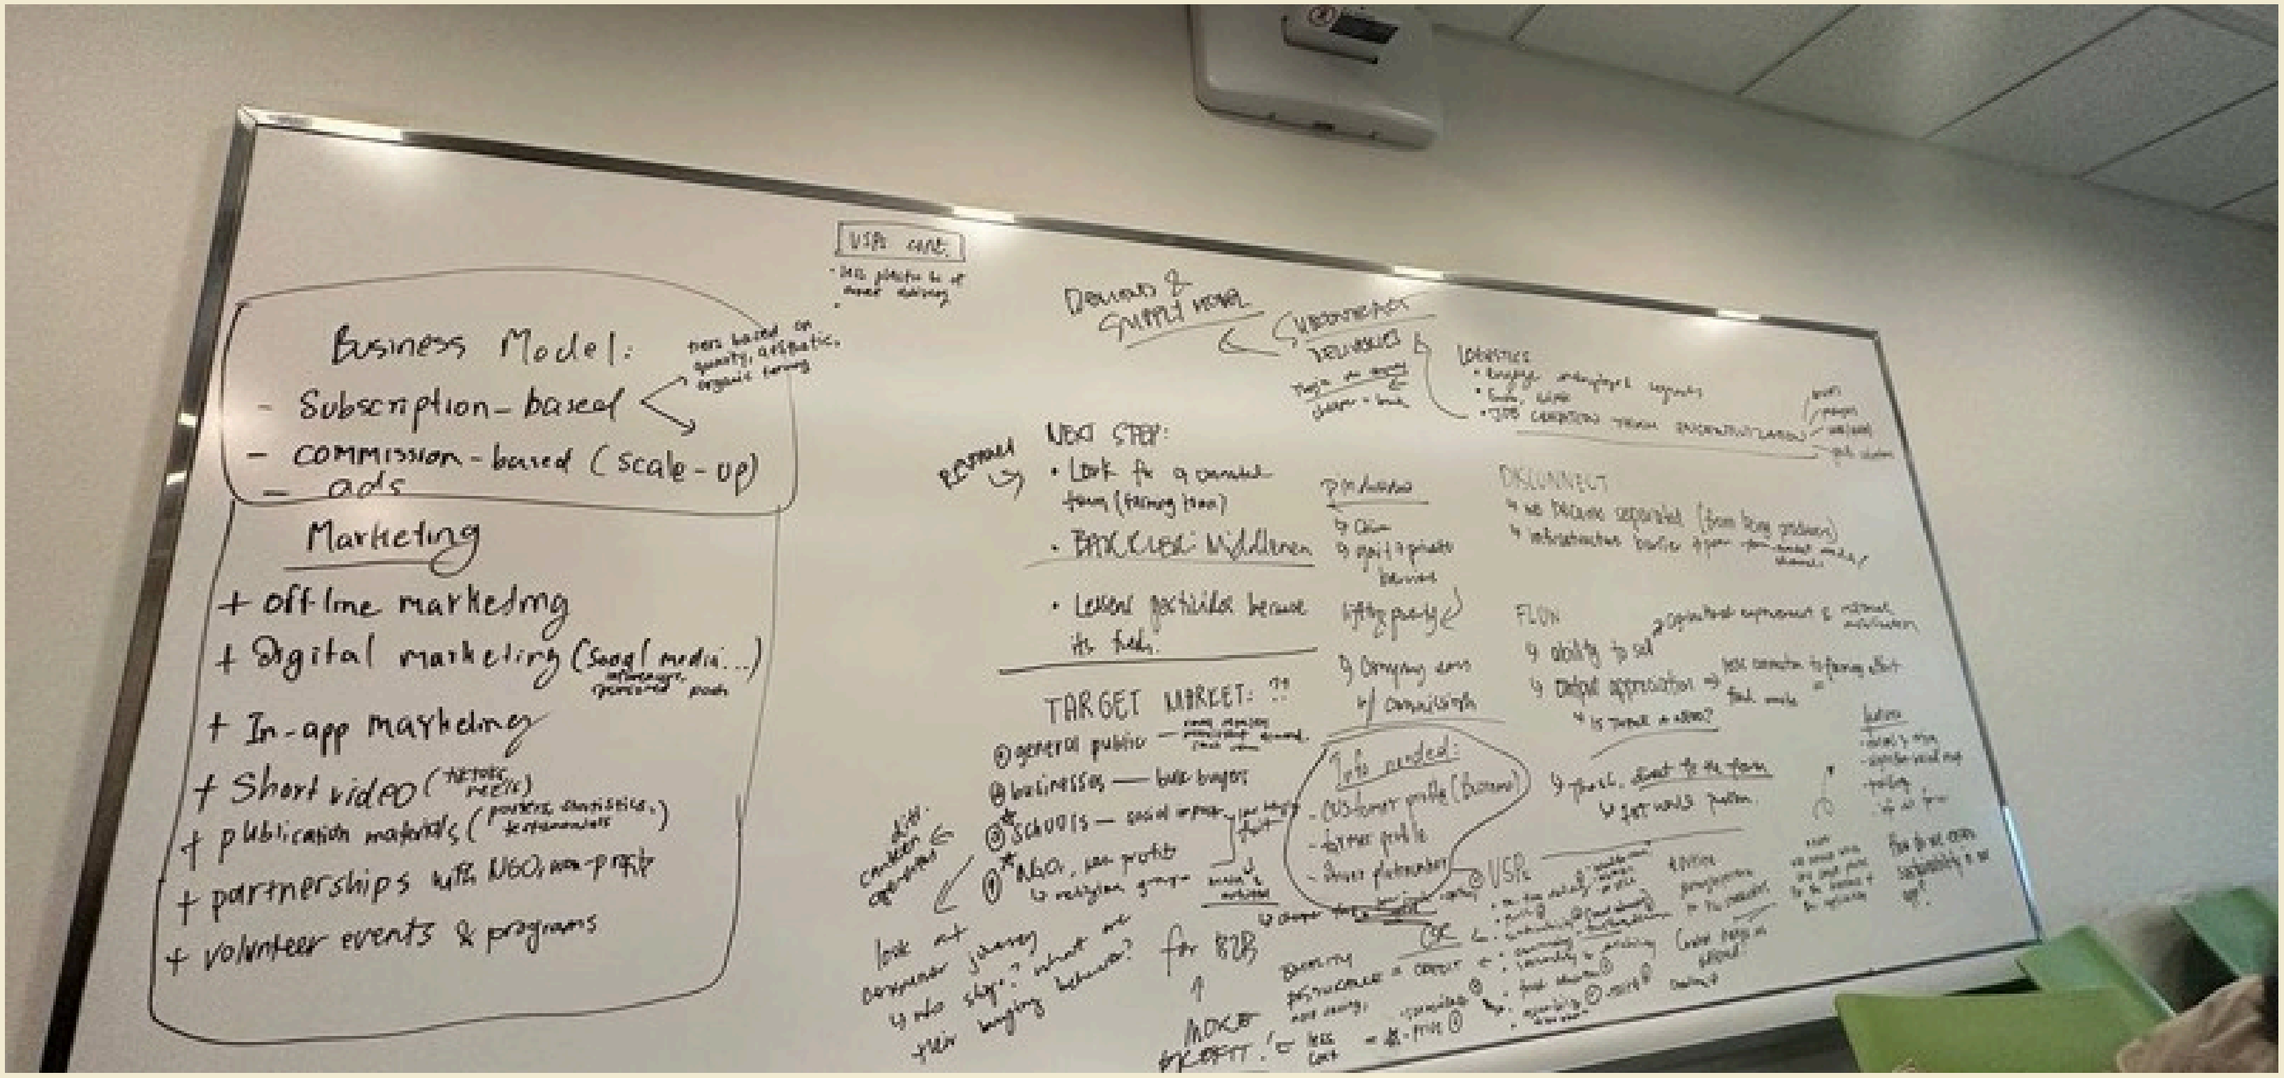

CHIN SOPANHA
VP on Advocacy
Royal University of Phnom Penh
BA in International Economics

CHYREL BRANZUELA
Chief Technology Officer
University of San Carlos - TC
BS in Computer Engineering

DR. CHEE HAN LIM
Mentor
Senior Lecturer at NUS College
Special Programmes (Global Experience & Impact Experience)

brain dump. everything.

Farm-to-Table Initial Ideation

Important question: can we do the app in 3 months? Outsource the developers

Disconnect
- become separated (from being producers)
- infrastructure barrier -> poor farm-market road/channels

*not only physical but also institution

Flow
- ability to sell -> agri empowerment and resource mobilization
- output appreciation -> less connection to farming effort = food waste

KPIs:
- Onboarded farm communities
- Users
- Volume sales
-

Pinduoduo
- China
- Government -> private businesses -> lifting poverty -> company earns with commissions

Features
- language options
- reviews and ratings
- algorithm-based maps
- tracking
- info about farmers

How do we ensure sustainability in our app?

outsource from vietnam?? websites like fivrr

Enumerate the material and non-material things needed to make the project happen

LOGISTICS
- engage unemployed segments
- grab, gojek
- job creation through incentivization -> drivers, packagers, cook, youth volunteers

USPs
- on-time delivery
- sustainability (smart consumption) trust
- accessibility
- taste
- price
- options
- cleanliness
- fresh
- food education

Target Market
- general public
- schools (smart and healthy consumption for student)
- NGOs, Non-profit (religious group, activists)

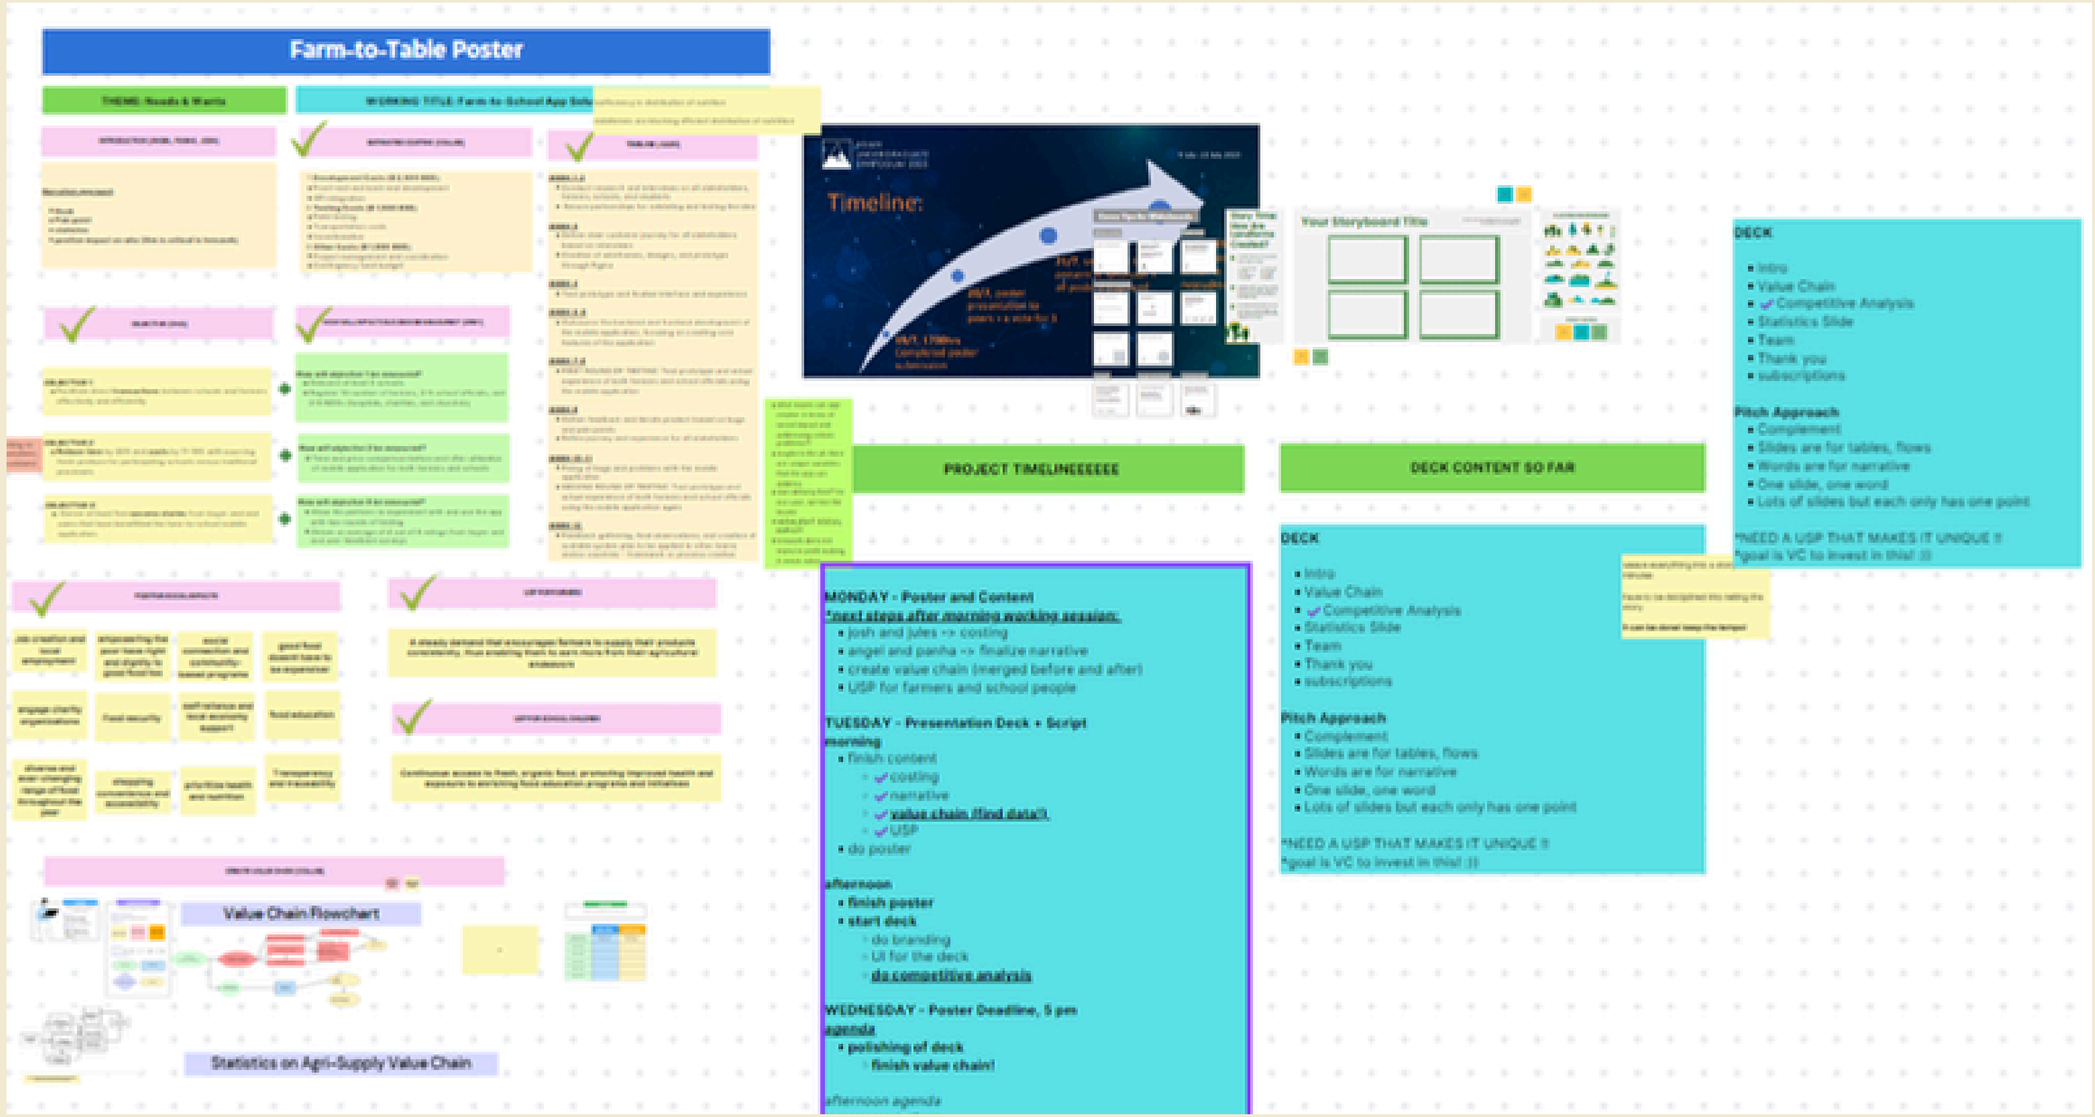

Business Model
- subscription-based -> (tiers based on quality, aesthetic, organic farming)
- ads
- commission-based

Marketing
- offline marketing
- digital marketing (social media, influencers, sponsored posts)
- in-app marketing
- short video (tiktoks, reels)
- publication materials (posters, statistics, testimonials)
- partnerships with NGO, non-profits
- volunteer events and programs

NEXT STEPS:
- Look for a connected farm to the city (do research)
- Barrier: Middlemen
- Lessens pesticide because its fields

INFO NEEDED:
- Customer profile (Business)
- farmer profile
- driver plate number

visualize

Pitch Approach
Complement
Slides are for tables, flows
Words are for narrative
One slide, one word
Lots of slides but each only has one point
*NEED A USP THAT MAKES IT UNIQUE !!
*goal is VC to invest in this!! :))
PROJECT TIMELINEEEEEE
DECK CONTENT SO FAR
MONDAY - Poster and Content
*next steps after morning working session:
josh and jules => costing
angel and pariha => finalize narrative
create value chain (merged before and after)
USP for farmers and school people
TUESDAY - Presentation Deck + Script
morning
finish content
costing
narrative
value chain (find data?)
USP
do poster
afternoon
finish poster
start deck
do branding
UI for the deck
do competitive analysis
WEDNESDAY - Poster Deadline, 5 pm
agenda
polishing of deck
finish value chain!
afternoon agenda
Value Chain Flowchart
Statistics on Agri-Supply Value Chain

organize

solve validated pain points, NOT mere assumptions

solve validated pain points,
NOT mere assumptions.

but how?

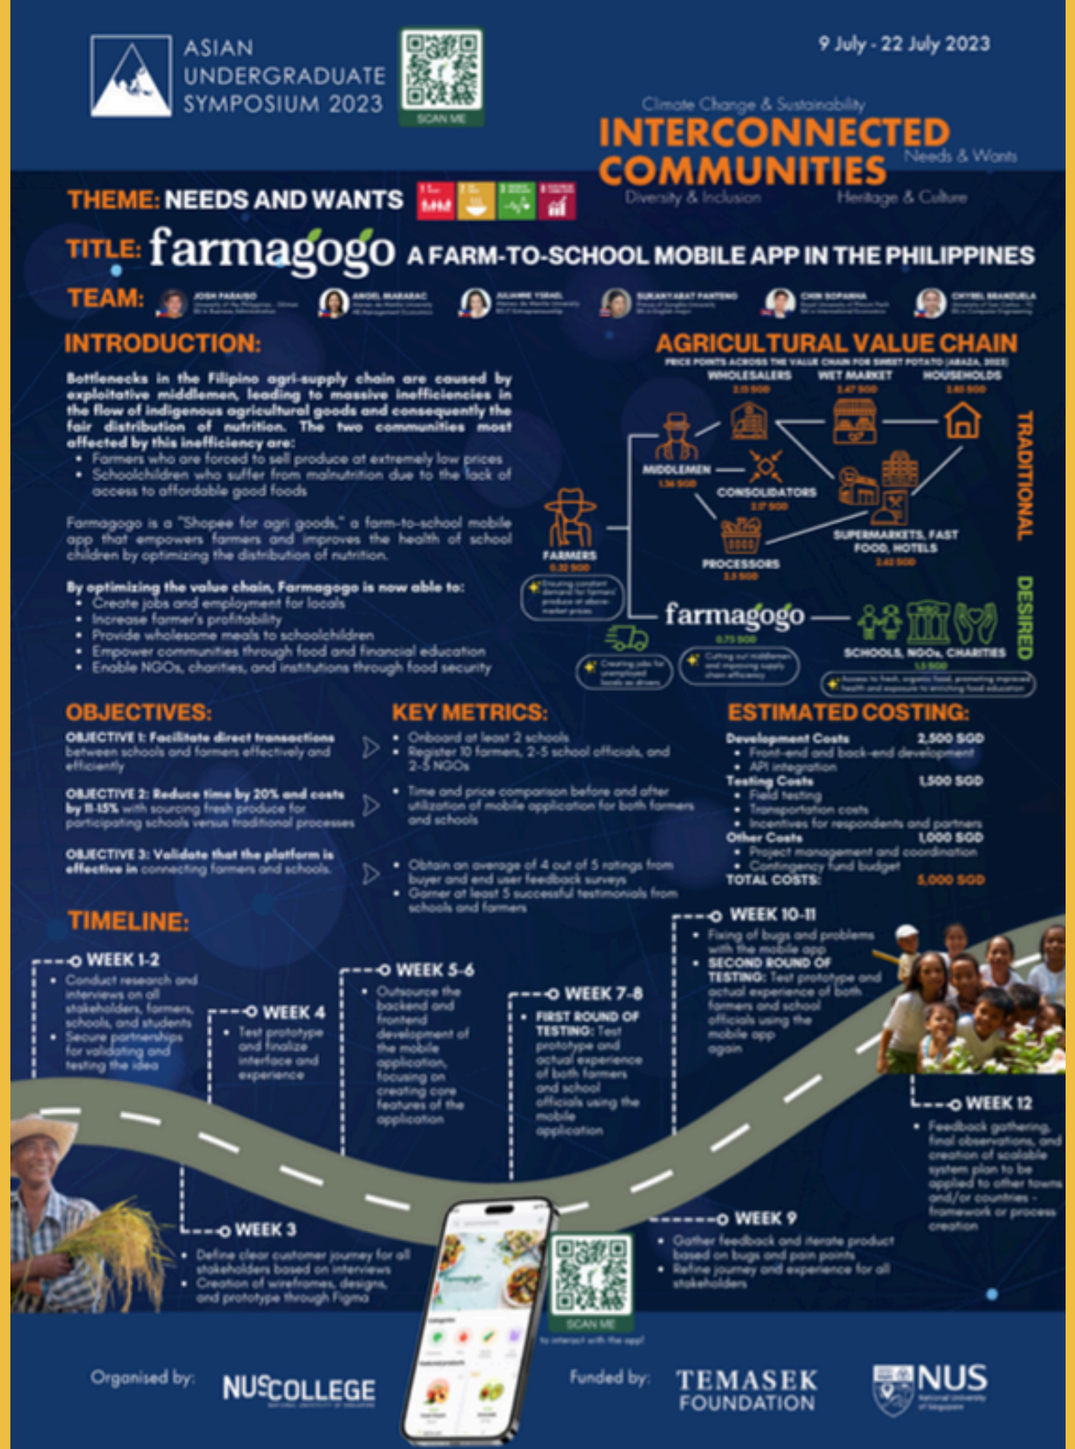

do research.
do interviews.
ask questions.
check news articles.

be curious.

don’t make a solution that is looking for a problem

Proposal Poster

- **Specific** BUT also **concise**
- Add **visuals** that aid your solution
- Everything can be relevant but **what is the most impactful**?
- Answer the most **basic questions**: What, Why, Where, Who, How?

Presentation Proper

Tell a story with empathy. Use statistics and data.

Presentation Proper

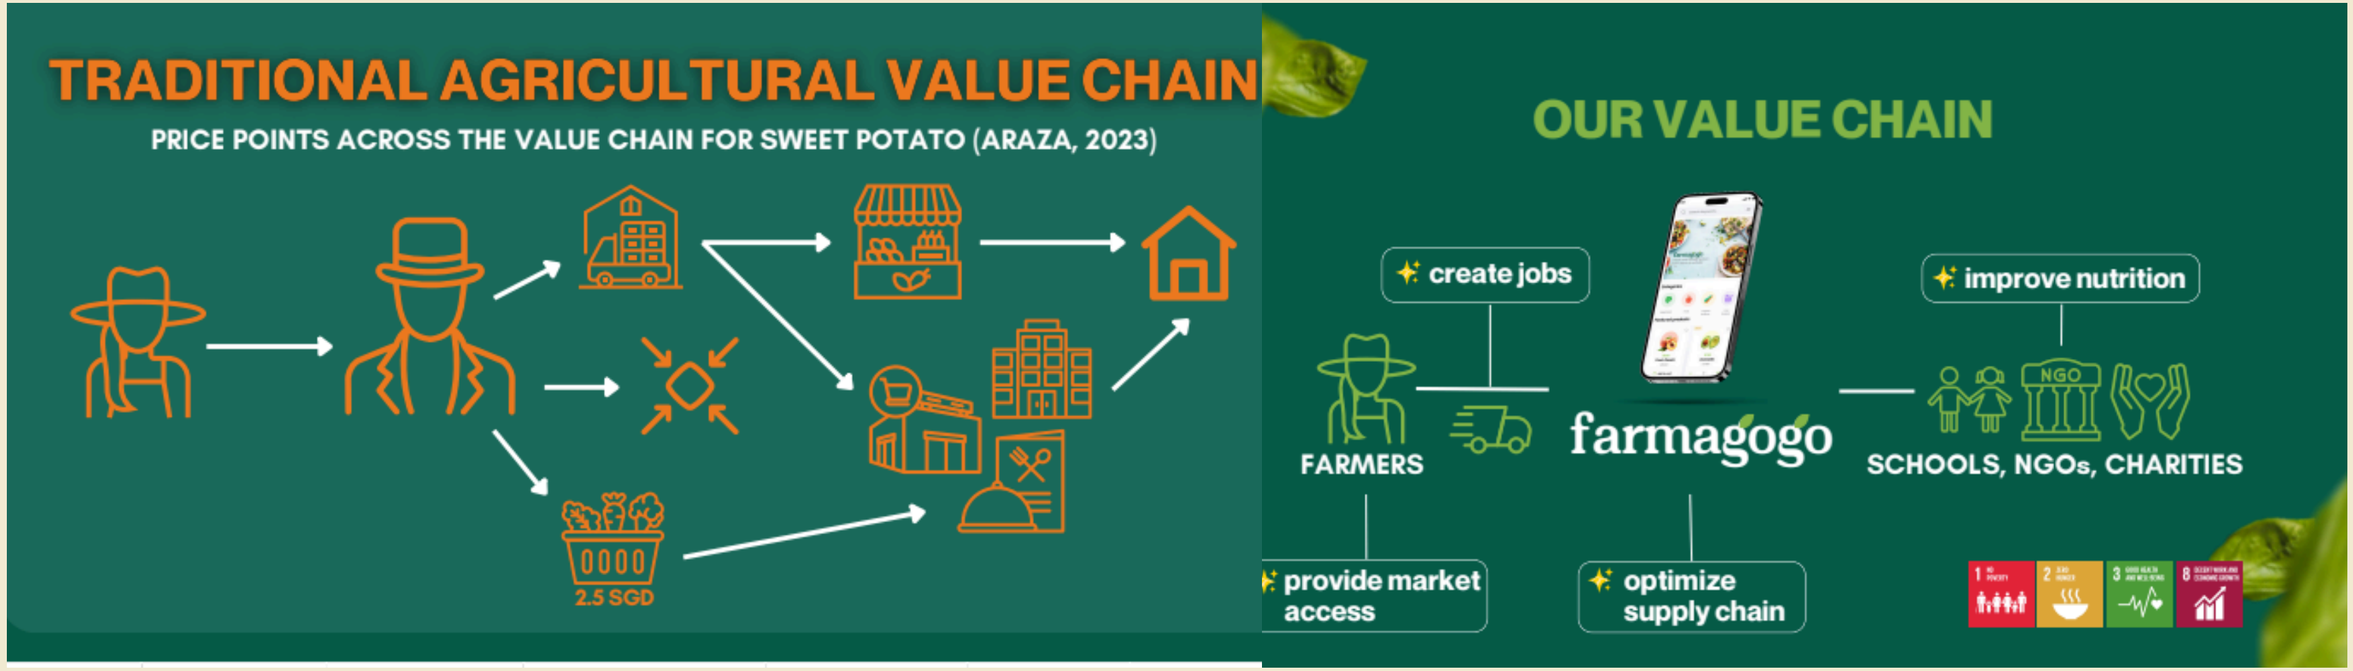

Tell a story with impact. Use statistics and data.

how do we make other people care about the problem we are solving?

Presentation Proper

Have compelling slides. Use flowcharts and diagrams.

Presentation Day!

Memorize first few lines and deliver with empathy. Use pauses to emphasize your story. Capture heart of audience.

HOWEVER! Fell short in EXECUTION and FEASIBILITY

Lessons

- Building a mobile application takes a long time!
- Narrow down stakeholders
- Disrupt a space with caution. One focus at a time.

Crucial Factors

1. **Feasible**
   - *can we execute it in a 3-month timeline?*
2. **Scalable**
   - *Can we replicate to other countries?*
3. **Social Impact**
   - *Is it adding value to our stakeholders?*

“If I cannot do great things, I can do small things in a great way.”
-Martin Luther King Jr.

Thank you so much and Goodluck!

@julianneysrael

Julianne Ysrael

hi group z! XD
